

CAN YOUR HEAT PRESS DO THIS?

Everything your business needs to succeed.

Measurable Production Insights

The wireless interface provides your business with insights into job and operator performance, and allows you to make proactive, data-driven changes in real-time.

Eliminate Scorching

Today's fabrics are trendy, stretchy, synthetic, and heat sensitive. The Hotronix® Heated Lower Platen puts the heat where you need it, underneath the adhesive, bonding the design to the garment faster.

Production Efficiency

Threadability® utilizes the open space below a Hotronix® heat press to accommodate the sliding of a garment onto the lower platen, in order to quickly and easily print and spin front to back without removing it.

Add More Counter Space to your Shop

The Heat Printing Equipment cart is designed to hold heat presses, small vinyl cutters, printers, and more. Pivoting wheels allow for easy movement around shops or events, and lock to ensure stability.

Easy, 1-Handed Platen Changes

Hotronix® has the largest selection of optional platens that can be easily removed with the simple flip of a latch. From duffle bags and hoodie sleeves, to soccer cleats, hat bills, and more, Hotronix® Quick Change Platens allow you to print more, expand your decorating capabilities, and create more sales opportunities.

Print More with Custom Platens

Hotronix® can create almost any type of Custom Heat Press Platen to fit your printing needs. Heat apply on odd-shaped items like gloves, bags, shoes, and more.

Precise Placement Every Time

For easy alignment and accurate placement of logos, names, and numbers, the Laser Alignment System from Hotronix® provides four adjustable lasers that project directly onto the lower platen.

Commemorate Special Occasions

Heat print logos, names, and numbers on inflatable sports balls. Print single or full-color designs in just seconds on synthetic leather footballs, volleyballs, soccer balls, and more with the Hotronix® Sports Ball Heat Press

Optimize Your Workspace

Heat up your material and increase productivity with the EZ Weeding™ Table. This table slightly heats your vinyl and promotes easier removal of the transfer from the carrier, resulting in effortless weeding and less material breakage.

Mobile Heat Printing Opportunities

The Hotronix® Heat Press Caddie™ Stand can be adjusted up to 40", while self-leveling casters provide portability and stability around your workspace. It also converts any Hotronix® Auto Open or MAXX® Clam into a threadable heat press.
