

AquaTru™ Dye-Block™

The industry's only true dye-blocking solution

Developed in the Stahls' laboratory, a proprietary Heat Transfer Ink formula makes AquaTru Dye-Block the answer to heat application on sublimated and synthetic garments.

GREAT FOR:

- Sublimated garments
- Low temperature applications
- Soft, stretchable fabrics

100% polyester,
with all-over
sublimated digital
camo print.

THE DYE MIGRATION SOLUTION

Decorate the most dye saturated, sublimated uniforms and garments with confidence. AquaTru Dye-Block is tested to block dye migration for professional results the first time, every time.

TURN DOWN THE HEAT

AquaTru Dye-Block applies as low as 275 degrees, so decorating today's synthetic fabrics is no problem. Spandex, Lycra®, or other heat sensitive fabrics can be decorated without scorching. Ruined garments are a thing of the past.

STAHL'S

The industry's premier source for heat printing products, services and equipment for team dealers, screen printers, embroiderers, and promotional product distributors.

SOFTNESS THAT STRETCHES

Once heat applied, AquaTru Dye-Block is soft and lightweight with excellent stretch and rebound. It moves with the garments so it's the perfect choice for performance wear and other stretchy garments.

LASTING QUALITY

AquaTru Dye-Block is CPSIA certified and also lab certified to block dye and remain soft through 125 wash cycles. It's the 12 second solution that lasts.
